COVID challenges – Interreg Europe solutions

https://www.interregeurope.eu/covid-19/

Check the new **COVID-19** section on our website in order to:

COVID-19 keyword!

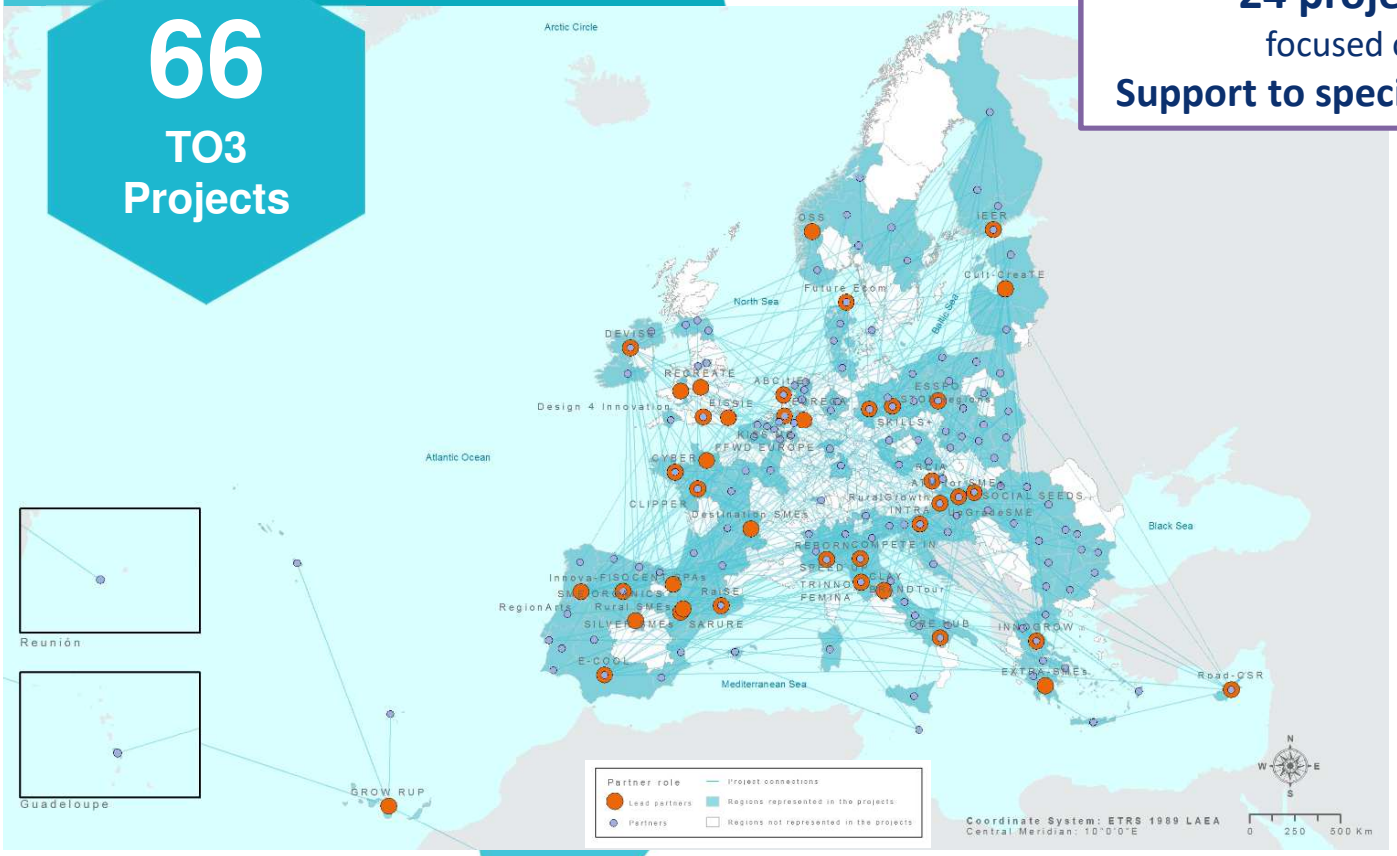
- Discover **good practices** from all across Europe that can help you mitigate the pandemic's effects;
- Join our **online thematic activities** that will inspire you and help you find solutions to common challenges;
- Request **tailored support** from our Policy Learning Platform experts;
- Find out related **news and events** published by us, our projects and other institutions.
- **Call for additional activities ongoing**

NEW

Supporting the competitiveness of SMEs

66
TO3 Projects

24 projects
focused on
Support to specific sectors



CLIPPER
Interreg Europe

The only project focused on **maritime industry**

11/13 good practices published on the **PLP GP database**

1/7 policy instruments already **improved**

What about the future?

- December 2019: first Programming Committee (PC) meeting
- February 2021: PC approved draft Cooperation Programme
- March to April 2021: public consultation
- Spring & summer 2021: final approval by Partner States
- Approval by EC expected early 2022
- First semester 2022: first call launched

No revolution…but evolution

Key features remain:

1. Pan-European
2. Similar overall objective
   - Regional development policy makers as core target groups
3. Similar means to achieve the objective
   - Main focus on capacity building

Proposals:

1. Focus on Structural Funds lightened
2. Learning by doing: pilot actions
3. Only one single priority in the programme
   - Better reflect the core nature of the programme (capacity building)

European Commission

Putting the Blue into the Green

Sustainable Blue Economy

17 May 2021
#EUGreenDeal
#BeGreenGoBlue

"We have an opportunity to start afresh, and we want to make sure that the recovery shifts the focus from mere exploitation to sustainability and resilience. Thus to be truly green, we must also think blue."

Virginijus Sinkevičius,
European Commissioner for Environment, Oceans and Fisheries

The EU Communication on sustainable blue economy
A new context

1. The **2030 Agenda** and the **European Green Deal** call for a sustainable transformation of the EU's economy and the blue economy is no exception;

2. « **There is no green without blue** »: the blue economy is part of the solution; we need to look at oceans to achieve the EGD objectives;

3. Transitioning to sustainable blue economy can contribute to the **recovery** of the sectors affected by the COVID crisis and bring more resilience;

4. Such a major shift call for joint efforts **across the different blue economy sectors and across the EU**

Setting a coherent and coordinated vision for blue economy

The communication:

- identifies concrete desirable transformations in the different sectors of the Blue economy that could guide public and private initiatives;

-sets directions in which the Commission proposes to intensify efforts, mobilizing all its policies and instruments;

-complements the other important initiatives of the Commission - such as the smart mobility strategy, the zero pollution action plan, the strategy for plastic...

Transforming the blue economy value chains

Decarbonisation - The EU strategy for offshore renewable energy

Part of the European Green Deal

Adopted on 19 November 2020

Energy Council conclusions in December 2020

A clean energy production issue: grid development, energy market and regulatory framework, renewables policies

… but also a strong maritime dimension:

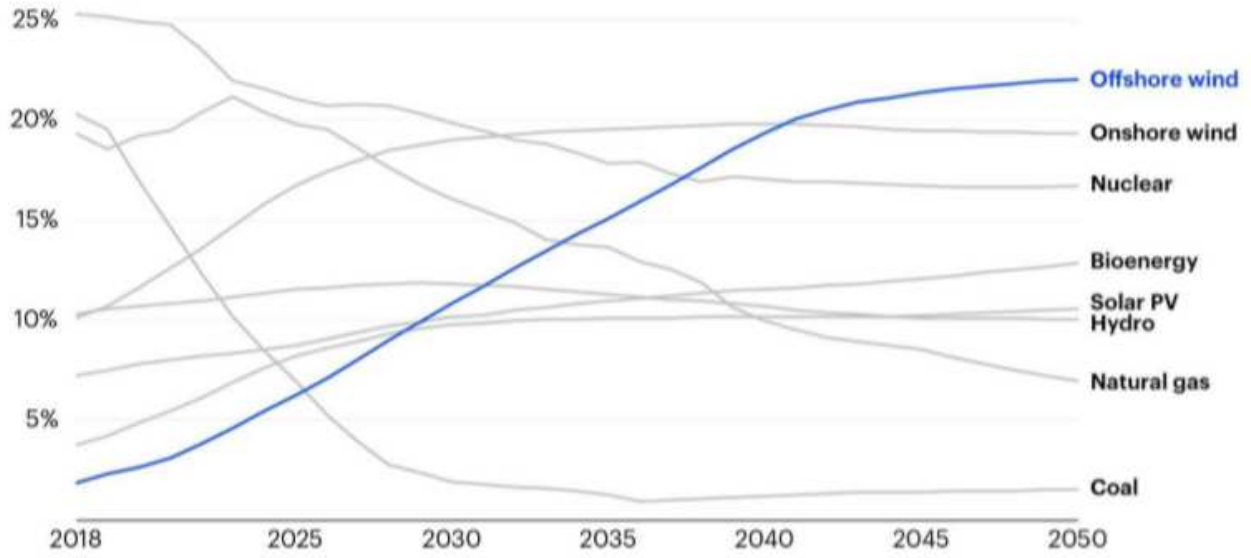
Maritime industry, infrastructures, investments, jobs and skills

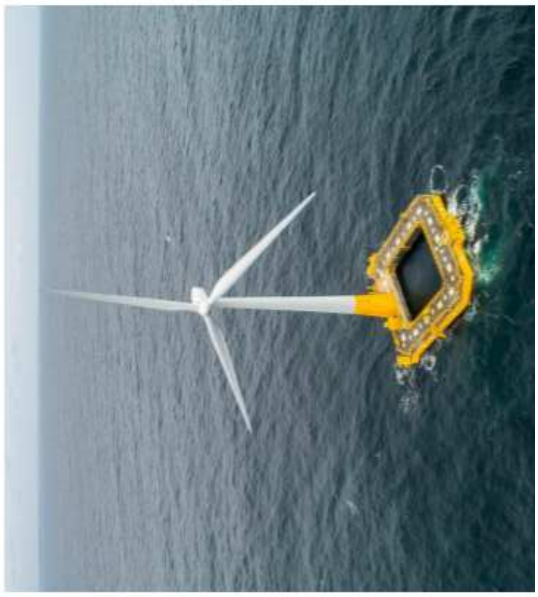
Access, sharing and planning of the maritime space

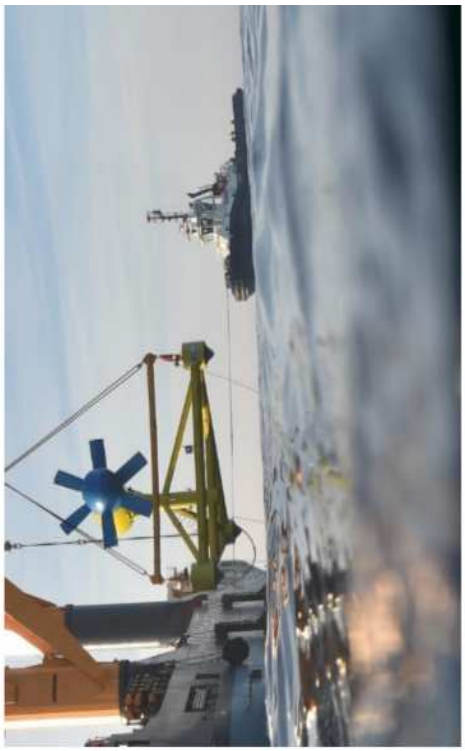
Protection and conservation of the marine environment

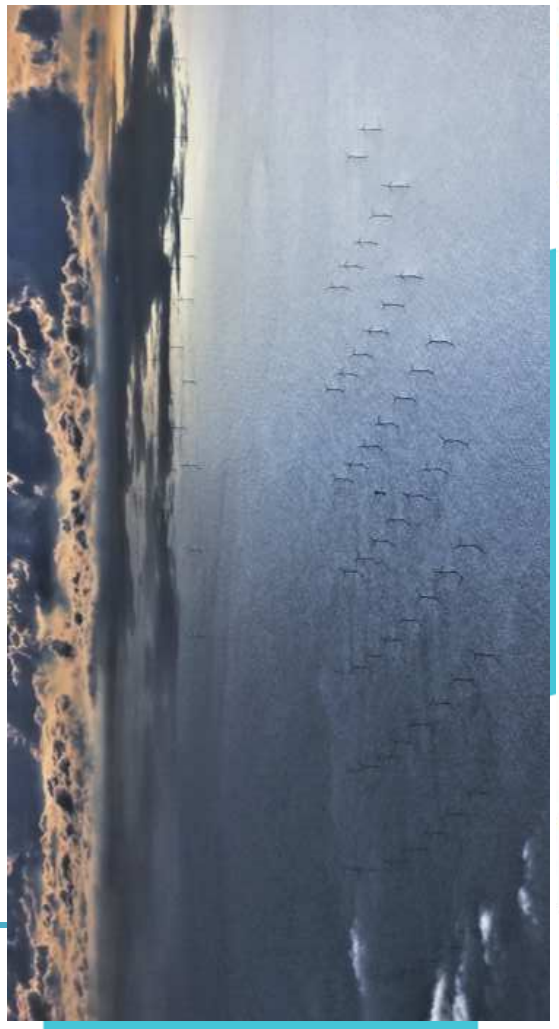
EU strategy on offshore renewable energy

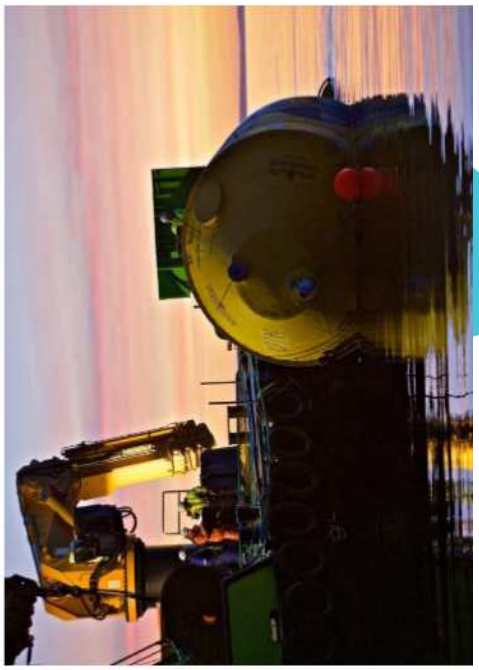
Shares of electricity generation by technology in the EU, Sustainable Development Scenario
Offshore Wind Outlook 2019





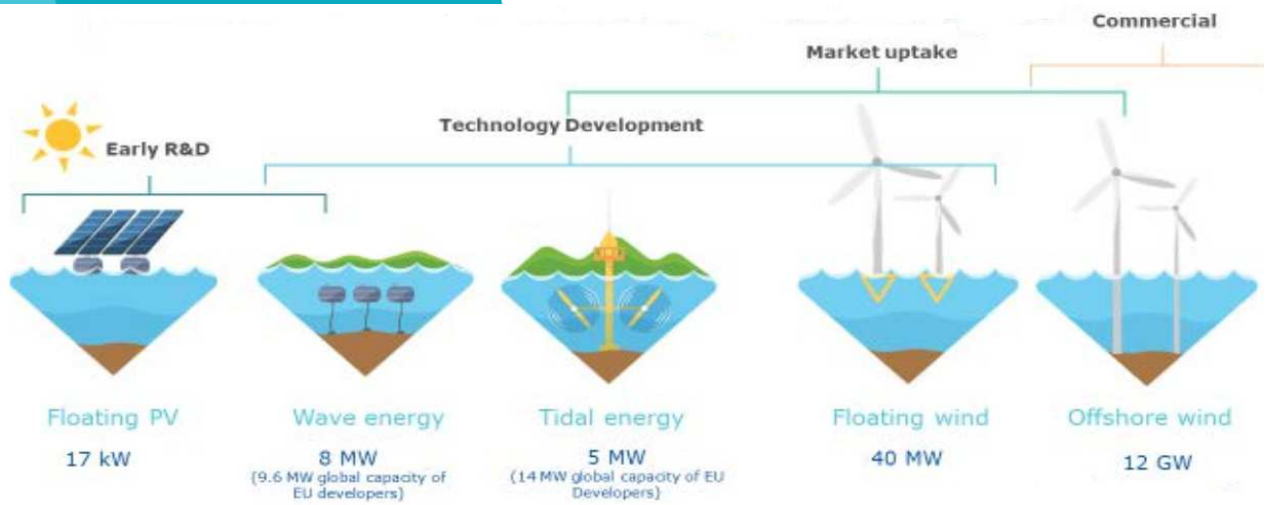






Strong blue economy dimension

The offshore renewable energy strategy in key figures



65.000 jobs

Offshore wind capacity: at least **60 GW in 2030 and 300 GW by 2050**
150 MW floating wind by 2024

Ocean energy (wave and tidal): 100 MW in 2025, at least **1 GW in 2030, 40 GW by 2050**

EUR 800 billion investment needed by 2050

Thank you
